Power & Control in Your Hands

Interactive & Engagement Features

S/N	Feature	Function
1	Social Wall	Animate your community with a social network within your app! Users can send posts and photos, geolocate other users' photos and comment their posts. You can lean back and see your user engagement growing by its own!
2	Chat	If you want to offer a complete chat solution to let your users chat in real-time that's the feature you need! Yes completely real-time by using websockets. It supports both public and private chatrooms!
3	Inbox	Need to send private messages with rich content and attachments to specific users? That's the feature you are looking for. Choose the user(s) you want to inform and they will get your private message with videos, text, images and attachments right in their Inbox feature. And, of course, they can answer you.
4	Appointments	Manage your appointments like a pro. It's now possible to add a complete appointment engine in your app and to manage multiple services and providers from one place. You will also be able to set working hours for these services, holidays slots and everything you would need to manage your appointments in the blink of an eye.

Informative & Educative Features

S/N	Feature	Function
1	The Bible	Allows App users to search and read bible verses from within the App. Save time for your members by allowing them to find their favorite bible verses from within the App.
2	Push Notifications	Contact your users whenever you want and whenever the need arises. It's unlimited. Schedule your notifications to be sent on specific dates and times. Send a geofenced notification to your clients based on their location.
3	Events	What if your users can be informed about your next events? Showcase your events from your Facebook page, or Google calendar. You can also create your own custom events.
4	Church Notices	Allows church members to keep up-to-date with any news and/or announcement within the church. Reduce the costs of printing hardcopy bulletins and send out digital bulletins to all the members with just a click of a button.
5	Know About Us	Provides information about the church so as to educate App users about the church. Win new members by telling your story on this page.
6	Quiz	Have you ever wondered why there are so many Quiz apps available on the app stores? Because it's fun! And your users want a bit of fun too, don't they? Bring it to them with our Quiz module and they will enjoy your apps for sure.
7	Surveys	Collect feedbacks from users to anything you want. Create complete surveys with complex questions and logical triggers. Export data and users answers in csv files, and build beautiful reports with charts and graphics.

Entertainment Features

S/N	Feature	Function
1	Audio	Add a music player to entertain your app users! Create playlists from iTunes, Soundcloud, Podcasts or your own files, and let the music play. Users can share and buy tracks from the store. Of course music can be played in background while the users keep browsing the app or lock their phone screen.
2	Videos	Add a touch of multimedia within your app. Integrate videos from Youtube, Vimeo, Podcasts. You can choose from integrating a complete channel from Youtube to a specific video from Vimeo.
3	Gallery	Highlight your app with attractive photo galleries. Create categories, import photos from your computer, Picasa or Instagram!

Power & Control in Your Hands

Supportive Features

S/N	Feature	Function
1	Donations	Collect donations from your app users from within the app anytime and anywhere through safe and secure online payment gateways (stripe, 2checkout and PayPal). They can use either their credit card or debit card to make their donations.
2	Prayer Requests	Allows App users to submit their prayer requests to the church for spiritual guidance and help. Maintain high levels of privacy while making it easy for members to reach out for help.
3	Contact Us	The page to gather all your contact info. All one-touch-call, geolocation, links to social pages, and more.
4	Classifieds (Marketplace)	With this feature, you can add a local classified ads marketplace for your users to offer products and services through your app. Set up your marketplace and let the users showcase their products and services and get customers.
5	Jobs	This is your feature for providing a recruitment tool from which companies can post their job offers. Each member you set as a company admin will be able to publish the available open positions. Candidates can apply directly from the app.
