Interactive & Engagement Features

S/N	Feature	Function
1	**Social Wall**	Animate your community with a social network within your app! Users can send posts and photos, geolocate other users' photos and comment their posts. You can lean back and see your user engagement growing by its own!
2	**Chat**	If you want to offer a complete chat solution to let your users chat in real-time that's the feature you need! Yes completely real-time by using websockets. It supports both public and private chatrooms!
3	**Inbox**	Need to send private messages with rich content and attachments to specific users? That's the feature you are looking for. Choose the user(s) you want to inform and they will get your private message with videos, text, images and attachments right in their Inbox feature. And, of course, they can answer you.
4	**Questions & Answers**	It allows users to ask questions to the community and help other users by replying to queries. Tags can be defined to classify different topics so that the searches are more easily performed.

Political Party Mobile App Core Features

Informative & Educative Features

| S/N	Feature	Function
1	**Push Notifications**	Contact your users whenever you want and whenever the need arises. It's unlimited. Schedule your notifications to be sent on specific dates and times. Send a geofenced notification to your clients based on their location.
2	**Events**	What if your users can be informed about your next events? Showcase your events from your Facebook page, or Google calendar. You can also create your own custom events.
3	**News Wall**	Oh my wall! Want to send your news in an attractive way? Just use the News Wall feature to send your information, photos, etc. and get your users engage with you by commenting and liking. Get useful feedbacks, improve your communication, collect the benefits of better user engagement.
4	**Party Manifestos**	Communicate your party manifestos to your members through this page. Let people know about your agenda and appreciate your plans for them.
5	**Know About Us**	Provides information about the party on this page so as to educate App users about the party. *Win new members by telling your story on this page.*
6	**Quiz**	Have you ever wondered why there are so many Quiz apps available on the app stores? Because it's fun! And your users want a bit of fun too, don't they? Bring it to them with our Quiz module and they will enjoy your apps for sure.
7	**Surveys**	Collect feedbacks from users to anything you want. Create complete surveys with complex questions and logical triggers. Export data and users answers in csv files, and build beautiful reports with charts and graphics.

Entertainment Features

S/N	Feature	Function
1	**Audio**	Add a music player to entertain your app users! Create playlists from iTunes, Soundcloud, Podcasts or your own files, and let the music play. Users can share and buy tracks from the store. Of course music can be played in background while the users keep browsing the app or lock their phone screen.
2	**Videos**	Add a touch of multimedia within your app. Integrate videos from Youtube, Vimeo, Podcasts. You can choose from integrating a complete channel from Youtube to a specific video from Vimeo.
3	**Gallery**	Highlight your app with attractive photo galleries. Create categories, import photos from your computer, Picasa or Instagram!

Supportive Features

S/N	Feature	Function
1	**Donations**	Collect donations from your app users from within the app anytime and anywhere through safe and secure online payment gateways (stripe, 2checkout and PayPal). They can use either their credit card or debit card to make their donations.
2	**Contact Us**	The page to gather all your contact info. All one-touch-call, geolocation, links to social pages, and more.
3	**Classifieds** *(Marketplace)*	With this feature, you can add a local classified ads marketplace for your users to offer products and services through your app. Set up your marketplace and let the users showcase their products and services and get customers.
